

Tenants' Pool Safety Responsibilities

- **Supervise young children in or near the pool area at all times.**
- Never prop pool gates open.
- Keep all climbable items (furniture, planters, BBQ etc) 900mm away from the outside of the pool fence and 300mm from the inside (if there are gaps in the pool fence.)
- Minimize moveable items around the pool area that may be used to assist climbing the pool fence.
- Do not fix climbable mesh with apertures greater than 13mm to the pool fence.
- Ensure the pool fence and gates are maintained in good working order. The gates must self close and self latch even from resting on the mechanism.
- Ensure a resuscitation sign is always visible from the pool area and be familiar with it.
